Mint Mark: No mint mark

Value: As a rough estimate of this coins value you can assume this coin in average condition will be valued at somewhere around \$3, while one in mint state (MS) condition could bring \$80 at auction if certified. This price does not reference any standard coin grading scale. So when we say average, we mean worn as would be expected from a coin in this age, and mint state meaning MS+ grade and certified*.

Total Produced: 87,500,000 **

Extra Info: There were around 4,000 proofs issued as part of the larger 87 million 1936 (p) mercury dimes. If you can find one for less than 2 thousand dollars in perfect shape it would be priced about right. When buying or selling Mercury Dimes full bands are key.
