

Type: [Washington Quarter](#)

Year: [1964](#)

Mint Mark: D

Value: As a rough estimate of this coins value you can assume this coin in average condition will be valued at somewhere around \$6, while one in mint state (MS) condition could bring \$70 at auction if certified. This price does not reference any standard coin grading scale. So when we say average, we mean worn as would be expected from a coin in this age, and mint state meaning MS+ grade and certified*.

Face Value: 0.25 USD

Total Produced: 704,135,000 **

Silver Content: 90%

Extra Info: Sadly...this was the last year that the Quarters were minted as 90% silver. Over 1 BILLION quarters were minted in 1964. I guess they were getting rid of their silver stockpiles in anticipation for the new devalued nickel and copper blend. This can be considered a key date.
