

**Type:** [Kennedy Half Dollar](#)

**Year:** [1979](#)

**Mint Mark:** D

**Value:** As a rough estimate of this coins value you can assume this coin in average condition will be valued at somewhere around 50 cents, while one in mint state (MS) condition could bring \$2 at auction if certified. This price does not reference any standard coin grading scale. So when we say average, we mean worn as would be expected from a coin in this age, and mint state meaning MS+ grade and certified\*.

**Face Value:** 0.50 USD

**Total Produced:** 15,815,000 \*\*

**Silver Content:** 0%

**Extra Info:** Look for the D mint mark on the bottom right on the front or obverse of this coin. About 15% of all the Kennedy Half Dollars minted in 1979 were minted at the Denver mint. Unfortunately all Half Dollars issued after 1970 and all Dimes, and Quarters minted after 1964 contain no silver content and are nothing more than a nickel jacket over a copper core. Half Dollars are still very popular with coin collectors today.
